

DOU Day conference registration form

1. Requirements

Functional Requirements:

- **User Input:** The form must accept the user's full name, email address, t-shirt size, and ticket type (Standard vs. VIP).
- **Dynamic Calculation:** The form must automatically calculate and display the total price based on the selected ticket type.
- **Validation:** The form must prevent submission if required fields are empty or if the email format is invalid.
- **Feedback:** The user must receive a visible confirmation message upon successful submission.

Non-Functional Requirements:

- **Usability:** The form must use clear labels and placeholders to guide the user.
- **Accessibility:** HTML must use semantic tags
- **Responsiveness:** The layout must adapt to mobile and desktop screens using CSS media queries.
- **Maintainability:** CSS and JavaScript must be separated into external files

2. Page Design
